

# COVID-19 as a Messiah

## An opportunity for change

This is a chance to re-imagine higher education in India. For long this has been elitist and exclusionary; education has been less about learning and more about acquiring degrees. The pandemic can change that if we let it and Friends' Footing is here to help you.

### We are planning to

1. Provide a medium where anybody can get in-depth information about the pandemic.
2. Make an e-education hub where anybody can ASK, EXPLORE, LEARN, and EVOLVE (AELE).

### 1. Opportunity out of Pandemic

Though online instruction will shape education in the future, there is much to absorb in the context of COVID-19.

There's much to imagine what the world would be like post-pandemic but one thing is certain that there will be upsurge in employment in certain sectors while some are expected to go down.

We are planning to organize online sessions where we will be discussing the picture of the world post-pandemic.

### 2. AELE

We will be providing a medium where you can interact with experts, learn from them, and evolve thereafter.

We are also planning to create a medium where you can find educated tutors willing to provide you (individually) either home tuition or online tuition.
